Profile

Computer Science student at the University of Trento with a Distinction in a prior ICT-focused qualification. Quality engineering and release contributor to a distributed workflow platform, with experience in end-to-end validation, regression testing, and failure-path checks. International ECIU project participant with CCNAv7 networking fundamentals.

Education

Bachelor of Science in Computer Science <i>University of Trento</i>	2025 - Present Trento, Italy
Certificate of Higher Education - Information and Communication Technologies <i>University of Bedfordshire</i> Distinction (EQF Level 5)	2021 - 2022 Luton, United Kingdom
Higher Secondary School Certificate <i>Royal National College for Boys and Girls</i>	2018 - 2020 Kharian, Pakistan

Project Experience

Quality Engineering and Release Contributor - Ordanis <i>Distributed Workflow and Execution Platform</i>	2026 - Present Remote
- Validate end-to-end workflow behaviour across successful, failed, retried, cancelled, and worker-loss scenarios. - Perform regression and failure-path checks, identify execution and interface issues, and support release verification before changes are shipped. - Provide product feedback on a platform built with Java, Spring Boot, gRPC, PostgreSQL, React, and TypeScript.	

International Project Experience

International Project Participant - ECIU University <i>Pitch It or Fix It: Venture Challenge</i>	2026 Lodz University of Technology, Poland
- Collaborated in an international team on a Grupa Krotoski challenge involving ESG reporting and business modelling. - Contributed to The Air Check, a real-time industrial air-emissions monitoring concept, using stakeholder communication, Scrum-based validation, business-model refinement, and pitch preparation.	

Work Experience

Production Line Worker <i>Galvanove SRL</i>	Jan 2025 - Mar 2025 Novellara, Italy
- Prepared materials and supported continuous production-line operations in a safety-focused industrial environment. - Performed visual quality checks, followed maintenance and workplace-safety procedures, and supported team logistics.	

Certification

CCNAv7: Introduction to Networks	Cisco Networking Academy
---	--------------------------

Skills and Languages

Quality Engineering: End-to-end validation, regression testing, failure-path testing, release verification, defect reporting
Networking: TCP/IP and OSI models, Ethernet, IP addressing, switching and routing fundamentals
Tools: Microsoft Word, Excel, PowerPoint, Office; Adobe Photoshop
Languages: Urdu (native), English (professional proficiency), Italian (A1)
